https://github.com/BouthaynaHammami
Manouba, Tunisie

Final-year engineering student specializing in Software Architecture at ESPRIT, with solid hands-on experience in fullstack development (Angular, .NET, Spring Boot) and microservices architecture design.

Autonomous across the full DevOps cycle (CI/CD, Docker, Kubernetes) and attentive to software testing best practices (JUnit, ISTQB, SonarQube).

Rigorous and curious, I am looking for a final-year internship (PFE) or a position in software architecture, fullstack development, or software quality, combining solid technical design with a spirit of innovation.

SKILLS

Languages : Java, Python, PHP, JavaScript, HTML, CSS

Frameworks & Mobile : Spring Boot, Angular, .NET, Android (Android Studio)

Databases : SQL (relational), NoSQL (Elasticsearch)

Tools, BI & Testing : Kibana, Power BI, Keycloak, ISTQB, JUnit, Postman, SonarQube

DevOps : Docker, Kubernetes, Jenkins (CI/CD)

Methodologies : Agile/SCRUM

PROFESSIONAL EXPERIENCE

IDA Conseil Informatique Inc.

June – August 2026

Full-Stack Developer — Summer Internship — Terreau Project

SaaS platform connecting Tunisian talent, Quebec SMEs, project owners and investors (Angular 19, ASP.NET Core .NET 10, Azure SQL, EF Core 10).

- Developed Angular 19 interfaces (standalone components, signals) for several modules of the platform, following a custom design system (Angular Material + Lucide).
- Contributed to the ASP.NET Core / EF Core 10 backend (profile management, missions, application workflows) and to the multi-role architecture (guards, protected routes, authorization).
- Worked in Agile/Scrum methodology, 2-week sprints, with regular code reviews and progress meetings.

TALYS

February – May 2024

Intern — Setting up an ELK Dashboard

- Analyzed and specified requirements for a KPI visualization and filtering solution via a custom dashboard, using the ELK stack (Elasticsearch, Kibana) for multiple user profiles.
- Integrated data and automated data feeds into Elasticsearch (performance, security, scalability); upskilled in Angular, Spring Boot and Kibana in a SCRUM environment.

ACADEMIC PROJECTS

Jungle In English — Microservices Architecture, DevOps & Machine Learning

- Modular academic and social management platform based on a microservices architecture: Spring Boot (backend), Angular (frontend), Keycloak (centralized SSO).
- CI/CD pipelines (Jenkins), Docker containerization and Kubernetes orchestration; features include learning paths, community spaces, and performance dashboards.
- Integrated Machine Learning modules: recruitment/staffing optimization, student dropout risk prediction, and personalized study plan generation.

Brise Douce Hotel — Hotel Management Platform

- Hotel booking platform based on a microservices architecture (9 independent services: customers, rooms, bookings, staff, maintenance, reviews, users).
- Centralized API Gateway, Service Discovery (Eureka) and centralized configuration (Config Server); asynchronous communication via RabbitMQ, MySQL persistence, Docker containerization.
- Secure authentication with Keycloak (OAuth2/JWT); Angular 18 frontend with Server-Side Rendering (Angular Universal).

Hospital Dashboard — Power BI, ETL & Machine Learning

- Designed an ETL pipeline and modeled a multi-table data warehouse (patients, visits, doctors, diagnoses, insurance, cities) in Power BI.
- Built an interactive 6-page dashboard (Overview, Financial, Patients, Providers, Geographic, Predictions) with dynamic navigation and 25+ DAX measures (revenue, urgency rate, satisfaction, unpaid rate, etc.).
- Integrated a Machine Learning revenue forecasting model (Predicted vs Actual) directly visualized in the report to support decision-making.
- Implemented dynamic filters (date, region) for in-depth KPI exploration.

FORMATION

2025 – Present

Engineering Degree — Software Architecture

ESPRIT — Higher Private School of Engineering and Technology, Ariana

2021 – 2024

Bachelor's Degree in Computer Science and Multimedia

ISAMM — Higher Institute of Multimedia Arts, Manouba

2020 – 2021

Technical Baccalaureate — Honors

Route de Chouigui High School, Tebourba

LANGUAGES

- Arabic: Native language
- French: Fluent
- English: Advanced
- German: Basic knowledge
